Economical Indicators – CPI (Consumer Price Index)

Turkiye

Consumer price indexes (CPIs) are index numbers that measure changes in the prices of goods and services purchased or otherwise acquired by households, which households use directly, or indirectly, to satisfy their own needs and wants. In practice, most CPIs are calculated as weighted averages of the percentage price changes for a specified set, or "basket", of consumer products, the weights reflecting their relative importance in household consumption in some period. CPIs are widely used to index pensions and social security benefits.

intermediary advisory services

Consulting

Mercer

Talent, health, retirement,
and investment consulting

OliverWyman

Management, economic,
and brand strategy consulting

Together, we can build brighter futures

At Mercer, we believe in building brighter futures.

Together, we're redefining the world of work, reshaping retirement and investment outcomes, and unlocking real health and well-being. We do this by meeting the needs of today and tomorrow. By understanding the data and applying it with a human touch. And by turning ideas into action to spark positive change.

For over 75 years, we've been providing trusted advice and solutions to build healthier and more sustainable futures for our clients, colleagues and communities.

Welcome to a world where economics and empathy make a difference in people's lives.

Welcome to brighter.
