# Economic Indicators

*Inflation*

1

# Economical Indicators – CPI (Consumer Price Index)

# Turkiye

***Consumer price indexes (CPIs) are index numbers that measure changes in the prices of goods and services purchased or otherwise acquired by households, which households use directly, or indirectly, to satisfy their own needs and wants. In practice, most CPIs are calculated as weighted averages of the percentage price changes for a specified set, or "basket", of consumer products, the weights reflecting their relative importance in household consumption in some period. CPIs are widely used to index pensions and social security benefits.***

**May 2024 - May 2025 Inflation 35,41%**
